### Privacy

Council will use any personal information provided for the intended purpose only and for remaining in contact with you. Council is authorised to collect this information in accordance with the *Local Government Act 2009* and other Local Government Acts. Your personal information is only accessed by persons authorised to do so. Your personal information is dealt with in accordance with council's privacy policy.

#### 4. Approval conditions for disposal of asbestos

1. Applications for asbestos disposal will only be accepted from addresses within the Local Government area of the Noosa Council.
2. An approval number will be issued to confirm these conditions under which the regulated waste will be accepted by Council and the time at which it is to be delivered to the site for disposal. This approval must be presented to the Weighbridge Operator at the time of disposal.
3. Persons wishing to dispose of this regulated waste without the necessary approvals and supporting documents completed without alteration will not be granted access to the disposal site.
4. Disposals will only be accepted between the hours of 7.30 am and 4.00 pm. It should be noted that disposals cannot be undertaken on any weekend or public holidays.
5. Evidence as to the currency of the transporter's Environmental Licence for the carrying of regulated wastes will be required for any loads above the threshold as provided in the Environmental Protection Regulation Act 2008. A Department of Environment and Heritage Protection Waste Tracking Certificate, will need to be provided for any loads above the threshold of 250 kg or being transported for fee or reward as provided in the Environmental Protection (Waste Management) Regulations 2000. The load will be inspected upon arrival at the site. If the necessary licences and certificates for the transportation of regulated waste are not produced, access will be denied until such time as they are produced.
6. Asbestos must be manually or mechanically unloaded. The use of gravity to unload the vehicle or refuse container is not permitted as the plastic encasing the material can be damaged through this method. Applicants/contractors who deliver asbestos in a 'skip' or tilt tray vehicle without any evident means of unloading other than gravity will be denied access to the site. No assistance is available from on-site personnel it is your responsibility.
7. Alternative disposal methods must receive prior approval from the Waste Management Staff prior to delivery to site for disposal.
8. A site will be specially prepared for the disposal of the materials at the landfill. This site will be held for the nominated day only due to operational constraints. If for some reason the disposal is not carried out on the nominated day a further fee may be payable for the preparation of another site, if the previous one has been covered in the site's general operations.
9. The disposal of regulated waste under this consent is required to be supervised by an officer authorised by Council. Whilst some flexibility is possible in the disposal date and time, the applicant should ensure that any changes to the disposal arrangements are discussed with the Council's Waste Management Staff.
10. Customers will be refused entry if deemed by the Landfill Operator to be improperly attired for safety at the tipping face. Customers must have the following clothing for personal protection: **thick soled boots, high visibility shirt or vest, and eye protection.** Customers must follow onsite instructions by the Landfill Operator for safe disposal of the asbestos load.

#### 5. Bagged asbestos waste

All asbestos must be collected in heavy-duty polyethylene bags with a minimum thickness of 0.2 mm and filled to no more than 50% capacity.

Maximum bag size 1200 mm (length) x 900 mm (width) must be observed.

The asbestos waste is to be sprayed with a sealant or wet with water prior to bagging.

Each bag must have affixed, to the exterior, a notice stating:

CAUTION ASBESTOS  
AVOID CREATING DUST  
SERIOUS INHALATION  
HEALTH HAZARD

#### Wrapped asbestos waste

Solid asbestos sheet wastes in polyethylene sheeting must have the polyethylene sheeting wrapped and sealed around the asbestos waste in appropriate sized bundles for disposal.

Wrapped bundles must have a maximum size 2400 mm (length) x 900 mm (width).

Should polyethylene sheeting be used less than 0.2 mm in thickness, then each bundle will be required to be double wrapped to contain the waste.

The asbestos waste is to be sprayed with a sealant or wet with water prior to wrapping.

Each bundle must have affixed, to the exterior, a notice stating:

CAUTION ASBESTOS  
AVOID CREATING DUST  
SERIOUS INHALATION  
HEALTH HAZARD
