28th November 2018

Construction of accessible bus stops - Leslie Drive Noosa Heads

Project summary

Work has commenced on this year's bus stop programme. Federal legislation requires all public transport bus stops must meet disability compliance standards by December 2022.

Work is set to commence on both bus stops on Leslie Drive near Weyba Creek. The works will include a new concrete boarding platform, incorporating new bus shelters.

Funding

The Queensland Government's Passenger Transport Accessible Infrastructure Program provides funding assistance to councils to help them achieve compliance. The funding ratio is currently dollar for dollar.

Noosa Council has allocated \$500,000 in this year's capital works programme including \$225,000 funding from State Government.

Duration of work

Work will commence on the first bus stop on Monday 3rd December with completion expected to be completed before Christmas, weather dependent.

The bus stop across the road is scheduled to commence in mid-January 2019 and is expected to take 4 weeks

Disruption to bus passengers

Each bus stop will close temporarily during the work. A temporary stop will be operational adjacent to the works.

Your patience during the work is appreciated.
