## Noosa Parade corridor upgrade, Noosa Heads Changes to parking

Major work to upgrade the Noosa Parade corridor, one of Noosa’s busiest pedestrian and cycle routes, is starting this month.

The \$8 million project is partially funded by the Department of Transport and Main Roads under the Cycle Network Local Government Grants Program, with Council funding the balance.

### On-street parking changes

Parking bays along Noosa Parade will be used as the temporary traffic lanes while the works progress in the median. The construction will be completed in 400m sections to minimise the impact on parking and ensure work zones are safe and manageable.

If you usually park a vehicle or boat trailer along Noosa Parade, you will need to make alternate arrangements while construction is underway in that area. Vehicles in the work zone will need to be towed. Parking bays will reopen as each stage is completed.

The first stage of works is starting, with parking bays being temporarily closed between Munna Point Bridge to Lagoona Drive on Noosa Parade from close of business Wednesday 9 February 2022.

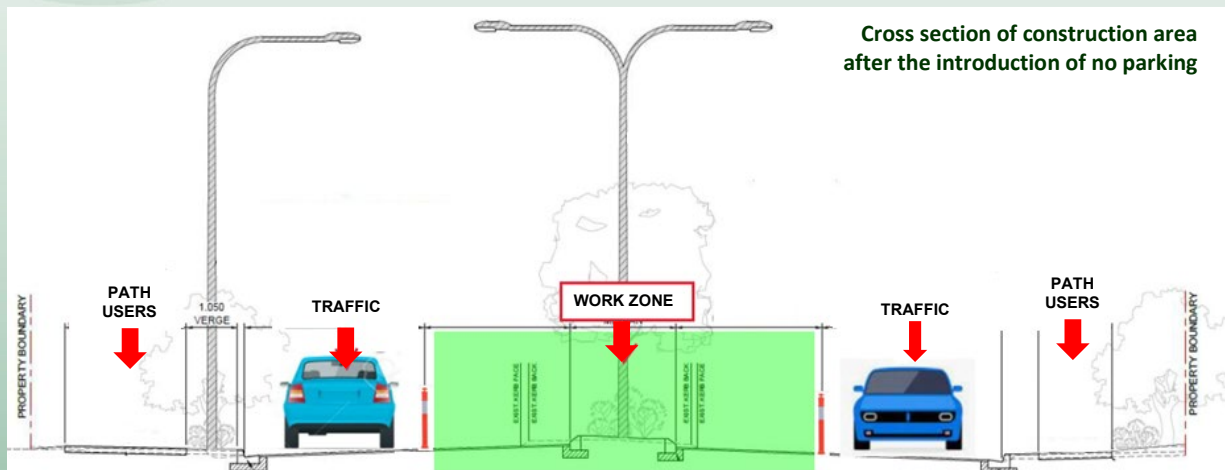

Access to properties along Noosa Parade will be maintained while work is underway. In the event, any disruptions are expected, such as during driveway demolition and construction, residents will be contacted before this work starts so alternative arrangements can be made.

### Community engagement

Council has undertaken extensive community and stakeholder engagement during the design and development phases of the project. In partnership with Bellwether Contractors Pty Ltd, Council will continue to provide the community with updates as works progresses.
