14th February 2022

Noosa Parade corridor upgrade, Noosa Heads Stage 1 update

Residents and motorists will soon see activity gearing up on the first stage of work on the Noosa Parade corridor upgrade. Stage 1 is between the Munna Point Bridge and Lagoon Drive and will be completed in June 2022, weather and construction conditions permitting.

Pre-construction surveys

Pre-construction property condition surveys will be conducted on some properties to document external features, such as, retaining walls, paths, driveways, and fencing. These surveys will provide an accurate record of the condition of notable structures near construction work.

A representative of AusDilaps, who is completing the surveys on behalf of Bellwether, will contact residents directly. Locals will see inspectors out and about during the coming weeks.

Munna Point Bridge to
Lagoon Drive

On-street parking changes

Parking bays have been temporarily closed between Munna Point Bridge and Lagoon Drive while these bays are used as the temporary traffic lanes during construction. Anyone that usually parks their vehicle or boat trailer in this area needs to make alternative arrangements. Vehicles in the work zone will be towed.

Vegetation removal

From Monday 14 February, vegetation in the median and road reserve will be removed. A better selection of trees and shrubs and more appropriate species will be planted as part of the upgrade. The enhanced landscaping will provide more shade and visual appeal through the corridor.

There will be short-term lane closures while clearing is underway. Traffic control will direct traffic and assist residents enter and exit their properties. Motorists are advised to drive to the changed conditions, follow signage, and allow additional travel time.
