## Project news

4<sup>th</sup> August 2022

### Main Beach sand recycling system line renewal, Noosa Heads

#### Project update

The Noosa Main Beach Recycling System Line will be renewed later this month as these pipelines are reaching the end of their remaining useful asset life.

The Sand Recycling System (SRS) is located at the end of Claude Batten Drive, Noosa Heads. The facility pumps sand recovered by sand shifter units operating on the adjacent beach.

Recovered sand is pumped through 1,600m of entrenched pipeline for beach disposal at the high-water mark. A number of disposal locations are located along the nourished beach, all connected by pipelines that distribute sea water and sand slurry.

There may be temporary closure of Beach Accesses 14, 15 and 16 while the work is underway. Our contractor will keep disruptions in these areas to a minimum and detours will be in place while work is conducted to ensure the safety of the community. Please observe detour signage and do not use this area while the work is underway.

#### Timing of works

Work will commence on 22 August and take up to three weeks depending upon favourable weather and construction conditions.

#### Community Impact

Traffic delays are expected along Hastings Street on Thursday 11 August from 5:30am for approximately three hours while the pipe is loaded into the area. The car park located next to the Noosa River Groyne will be closed whilst the pipe is transported to site and traffic control will be onsite to direct motorists.
