## Tree Works - Noosa Waters Area

### Project Summary

As part of Council's Proactive Tree Management Program, Council is undertaking the next round of palm removals on public land in Noosa Waters and surrounding area. This is to reduce constant maintenance requirements and most trees being removed have originated from customer requests.

These removals will involve a chipper and truck with a team of tree technicians and the use of a stump grinder.

### Scheduled Works:

Weather permitting, the works should commence on 4 October 2022 and continue for approximately 2 weeks.

### Impact

Noosa Council is committed to minimising disruption to our immediate neighbours during project works.

**Replacement trees and offsets:** As per Council's Tree Management on Public Land policy, where possible suitable replacements will be planted with an extended maintenance period.

### Further information

Please contact Council's Tree Supervisor on 07 5329 6500.
