

## Part 5 Tables of Assessment

### 5.1 Preliminary

The tables in this part identify the category of development, and the category of assessment and assessment benchmarks for assessable development in the planning scheme area, as well as any relevant requirements for accepted development.

### 5.2 Reading the tables

The tables identify the following:

- (1) the category of development:
  - (a) prohibited;
  - (b) accepted, including accepted with requirements; and
  - (c) assessable development - code or impact.
- (2) the category of assessment, code or impact, for assessable development in:
  - (a) a zone and, where used, a precinct of a zone; and
  - (b) an overlay where used.
- (3) the assessment benchmarks for assessable development and requirements for accepted development, including:
  - (a) whether a zone code or specific provisions in the zone code apply (shown in the 'assessment benchmarks' column);
  - (b) whether a local plan code or specific provisions in the local plan code apply (shown in the 'assessment benchmarks' column); and
  - (c) whether an overlay code applies or specific provisions in the overlay code apply (shown in the 'assessment benchmarks' column).
  - (d) any other applicable code(s) (shown in the 'assessment benchmarks' column).

**Editor's note:-** Where Acceptable Outcomes (AOs) are listed as requirements for accepted development, if all the sub-sections of an AO against a particular Performance Outcome apply (for example AO1.1, AO1.2, AO1.3) only the parent AO number is listed (AO1). If sub-numbers appear it means not all the AOs against that specific Performance Outcome apply, just those listed.
- (4) any variation to the category of assessment (shown as an 'if' in the 'category of assessment' column) that applies to the development.

**Note—**Development will only be taken to be prohibited development under the planning scheme if it is identified as prohibited development in schedule 10 of the Regulation.

**Editor's Note—**Examples of matters that can vary the category of assessment are gross floor area, lot size, or precinct provisions.

### 5.3 Categories of development and assessment

#### 5.3.1 Process for determining the category of development and the category of assessment for assessable development

The process for determining a category of development and category of assessment is:

- (1) for a material change of use, establish the use by reference to the use definitions in [Schedule 1 Definitions](#).
- (2) for all development, identify the following:
  - (a) the zone or zone precinct that applies to the premises, by reference to the zone map in [Schedule 2 Mapping](#)
  - (b) if an overlay applies to the premises, by reference to the overlay maps in [Schedule 2 Mapping](#).

- (3) determine if the development is accepted development under schedule 6 of the Regulation

**Editor's Note—**Schedule 6 of the Regulation prescribes development that a planning scheme can not state is assessable development where the matters identified in the schedule are met.

- (4) determine if the development is assessable development under schedule 10 of the Regulation Part 1-12 and 14-21.
- (5) Otherwise, determine the initial category of assessment by reference to the tables in:

- (a) [Section 5.5 - Categories of development and assessment—Material change of use](#)
- (b) [Section 5.6 - Categories of development and assessment—Reconfiguring a lot](#)
- (c) [Section 5.7 - Categories of development and assessment—Building work](#)
- (d) [Section 5.8 - Categories of development and assessment—Operational work](#)

- (6) a precinct of a zone may change the categories of development or assessment and this will be shown in the 'category of assessment' column of the tables in sections 5.5 - Categories of development and assessment - Material change of use.
- (7) if an overlay applies, refer to [Section 5.9 - Category of development and assessment—Overlays](#), to determine if the overlay further changes the category of development or assessment.

## 5.3.2 Determining the category of development and categories of assessment

- (1) A material change of use is assessable development requiring impact assessment:
  - (a) unless the table of assessment states otherwise
  - (b) if a use is not listed or defined
  - (c) unless otherwise prescribed within the Act or the Regulation.
- (2) Reconfiguring a lot is assessable development requiring code assessment unless the tables of assessment state otherwise or unless otherwise prescribed within the Act or the Regulation.
- (3) Building work and operational work are accepted development, unless the tables of assessment state otherwise or unless otherwise prescribed within the Act or the Regulation.
- (4) Where development is proposed on premises which are included in more than one zone or overlay, the category of assessment which applies is the highest category for a zone or an overlay in which the development or any aspect of the development is to occur.

**Editor's Note**—For example, if premises are included in the Rural zone and the Environmental management and conservation zone and a Biodiversity overlay applies to that part of the premises included in the Environmental management and conservation zone, where development or any aspect of development is only proposed in the Rural zone part of the premises, then the category of assessment is that applicable to the Rural zone only.

- (5) Where development is proposed on premises partly affected by an overlay, the category of development or assessment for the overlay only relates to the part of the premises affected by the overlay.
- (6) For the purposes of schedule 6, Part 2 Material change of use section 2 (2)(d) of the Regulation, an overlay does not apply to the premises if the development meets the acceptable outcomes that form the requirements for accepted development in the relevant overlay code.
- (7) If development is identified as having a different category of development or category of assessment under a zone than under an overlay, the highest category of development or assessment applies as follows:
  - (a) accepted development subject to requirements prevails over accepted development
  - (b) code assessment prevails over accepted development where subject to requirements and accepted development
  - (c) impact assessment prevails over code assessment, accepted development where subject to requirements and accepted development.
- (8) Despite sub-subsections 5.3.2 (4) and (7) above, a category of assessment in a zone and a category of assessment in an overlay overrides a category of assessment in a zone or local plan.
- (9) Provisions of [Part 10 Other plans](#) section may override any of the above.
- (10) The category of development prescribed under Schedule 6 of the Regulation override all other categories of development or assessment for that development under the planning scheme to the extent of any inconsistency.

**Editor's Note**—There are no provisions in Part 10.

**Editor's Note**—Schedule 7 of the Regulation also identifies development that the state categorises as accepted development. Some development in the schedule may still be made assessable under the planning scheme.

- (11) Despite all of the above, if development is listed as prohibited development under schedule 10 of the Regulation, a development application cannot be made.

**Note**—Development is to be taken to be prohibited development under the planning scheme only if it is identified in schedule 10 of the Regulation.

## 5.3.3 Determining the requirements for accepted development and assessment benchmarks and other matters for assessable development

- (1) Accepted development does not require a development approval and is not subject to assessment benchmarks. However, certain requirements may apply to some types of development for it to be accepted development. Where nominated in the tables of assessment, accepted development must comply with the requirements identified as acceptable outcomes in the relevant parts of the applicable code(s) as identified in the relevant column.
- (2) Accepted development that does not comply with one or more of the nominated acceptable outcomes in the relevant parts of the applicable code(s) becomes code assessable development unless otherwise specified.
- (3) The following rules apply in determining assessment benchmarks for each category of development and assessment:
- (4) Code assessable development:
  - (a) is to be assessed against all the assessment benchmarks identified in the assessment benchmarks column;
  - (b) that occurs as a result of development becoming code assessable pursuant to sub-section 5.3.3(2), must:
    - (i) be assessed against the assessment benchmarks for the development application, limited to the subject matter of the required acceptable outcomes that were not complied with or were not capable of being complied with under sub-section 5.3.3(2)
    - (ii) comply with all required acceptable outcomes identified in sub-section 5.3.3(1), other than those mentioned in sub-section 5.3.3(2);
  - (c) that complies with the performance or acceptable outcomes complies with the purpose and overall outcomes of the code;
  - (d) is to be assessed against any assessment benchmarks for the development identified in section 26 of the Regulation.

**Editor's Note**—Section 27 of the Regulation identifies the matters code assessment must have regard to.

- (5) Impact assessable development:
  - (a) is to be assessed against the identified assessment benchmarks in the assessment benchmarks column (where relevant)
  - (b) is to be assessed having regard to the whole of the planning scheme, to the extent relevant
  - (c) is to be assessed against any assessment benchmarks for the development identified in section 30 of the Regulation

**Note**—The first row of each table of assessment is to be checked to confirm if there are assessment benchmarks that commonly apply to general scenarios in the zone, local plan or overlay.

**Editor's Note**—Section 31 of the Regulation identifies the matters that impact assessment must have regard to.

## 5.4 Regulated categories of development and categories of assessment prescribed by the Regulation

### Section not used

**Editor's Notes**—The following schedules of the Regulation are relevant to the Noosa Planning Scheme:

- schedule 6, part 2, section 6 of the regulation Material change of use for community residence
- schedule 12 of the regulation, Particular reconfiguring a lot requiring code assessment
- schedule 13 of the regulation, Requirements for cropping involving forestry for wood production

## 5.5 Categories of development and assessment—Material change of use

The following tables identify the categories of development and assessment for development in a zone or a precinct for making a material change of use.

## 5.9 Categories of development and assessment - Overlays

The following tables identify where an overlay changes the categories of development and assessment from that identified in a zone or local plan and the relevant assessment benchmarks.

**Note**—Some overlays may only be included for information purposes (e.g agriculture). This may result in no change to the level of assessment or assessment criteria under the planning scheme.

**Note**—Where development is proposed on land that is included in more than one overlay, the level of assessment is the highest level for each aspect of development under the applicable overlay.

**Note**—Development that is not identified as being subject to an overlay in these tables does not require assessment against an overlay code.

Development subject to overlay	Categories of development and assessment	Assessment benchmarks for assessable development
<b>Landslide Hazard Overlay - if in a moderate, high or very high landslide hazard area</b>		
Material change of use, where not in an existing building; or for a dwelling house; or for a Community residence; or a Home-based Business; or Rooming accommodation in the Low Density Residential Zone; or Short-term accommodation if within a Dwelling house.	Code assessment

Development subject to overlay	Categories of development and assessment	Assessment benchmarks for assessable development
<b>Regional Infrastructure Overlay - if in a water resource catchment and water supply buffer area</b>		
Material change of use, other than in an existing building, and not involving a dwelling house on an existing lot or community residence on an existing lot.	<b>Code assessment</b>	
	If involving: (a) the establishment, expansion or upgrade of an on-site wastewater treatment system; or (b) increasing the number of people living or working on site; (c) a rural activity storing chemicals or livestock on site	<a href="#">Regional Infrastructure Overlay Code</a>
Reconfiguring a lot	<b>Code assessment</b>	
	If increasing the number of lots	<a href="#">Regional Infrastructure Overlay Code</a>
Operational work involving excavation or filling of land not associated with a material change of use or reconfiguring a lot	<b>Code assessment</b>	
	If involving: (a) excavating 100m <sup>3</sup> or more of material; or (b) filling land with 500m <sup>3</sup> or more of material with an average depth of 500mm or greater	<a href="#">Regional Infrastructure Overlay Code</a>
<b>Regional Infrastructure Overlay - gas pipeline corridor and buffer area or major electricity infrastructure or adjoining major electricity infrastructure</b>
